

{ PVA-550 }

Aqueous Dispersion of Poly Vinyl Acetate Homopolymer Emulsion

Product specification

Properties	Results
Type of polymer:	Vinyl acetate Homopolymer
PH @ 25c° :	4,0 – 5,0
Solid content :	50±2%
Viscosity @ 25c°(Visco basic plus):	1200±50 25c° Poise
Average particle size (µm) approx:	0.6-2
Stabilizing system :	Poly vinyl alcohol
Density :	1.08 gr/cm3
Free monomer content:	≥ 0.3%
M.F.F.T:	+12
Tg c°:	+29 c°

weight/gallon:

125 kg

Application:

Hard wood adhesives	Wood adhesives	Paper adhesives	textile lamination	textured finishes	emulsion paints	can sealing
			■	■		

Textile finishes , lamination , binder for carpet.

Storage:

PVA-295 has a shelf life of six months at 10 – 30 °C in tightly sealed containers.
